# Proposed Follow-on Acquisition of KMC Interest

Positioned to deliver value to KIT and its Unitholders

1

Increase ownership in an existing asset with strong operating track record

2

Strong and stable cash flow generation underpinned by robust long-term contracts with well-mitigated risks

3

Increase KIT's exposure to an essential infrastructure asset supporting singapore's long-term energy security

4

Accretive acquisition that strengthens portfolio resiliency

▲ 8%

*Pro forma* Funds from Operations (FFO)<sup>1</sup> for FY 2025 up from S\$326 mn to S\$352 mn post acquisition

▲ 6%

*Pro forma* DPU<sup>2</sup> for FY 2025 up from 3.94 S cts to 4.18 S cts post acquisition

Notes:

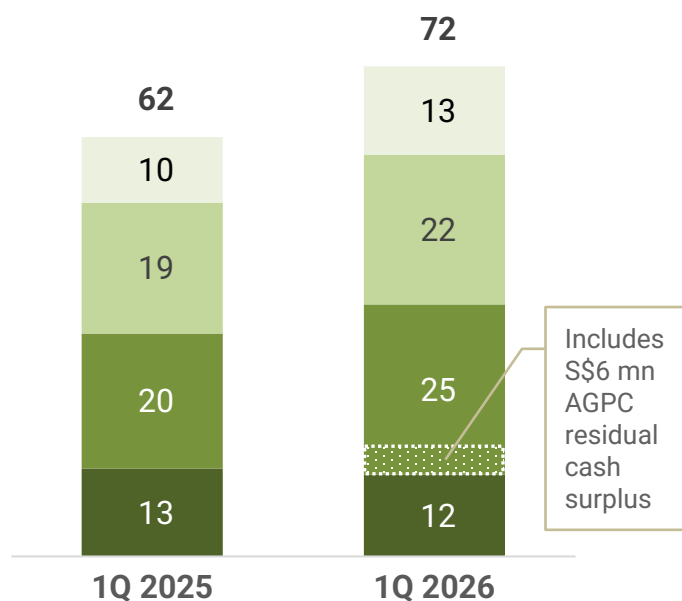

- Pro forma* figures assume the estimated transaction expenses and purchase consideration are funded by combination of internal resources and/or external borrowings. The DPU for FY 2025 was 4.10 Singapore cents. Assuming the Proposed Transaction had been completed on 1 January 2025 and KIT held the interests acquired pursuant to the Proposed Transaction through to 31 December 2025, the *pro forma* DPU adjusted for the Proposed Transaction would be 4.34 Singapore cents, representing a change of approximately 6%. Rule 1010(9) of the Listing Manual requires that the issuer disclose the effect of the transaction on the earnings per share of the issuer for the most recently completed financial year, assuming that the transaction had been effected at the beginning of that financial year. The effect of the Proposed Transaction on the DPU is used instead as it is a more appropriate measure for a business trust. Distributable Income is computed as FFO less mandatory debt repayment and other charges, credits or adjustments as deemed appropriate by the Trustee-Manager. DPU is computed as Distributable Income divided by the weighted average Units of 6,084,672,093 as of 31 December 2025.
- Based on DPU declared for FY 2025 and assuming all distributable income generated by the Proposed Transaction will be distributed to the shareholders of KMC, and assuming cash distributions received from the Proposed Transaction, net of corporate expenses, is fully distributed to Unitholders. The *pro forma* DPU following the Proposed Transaction set out herein should not be interpreted as being representative of the future DPU.

# Energy Transition

Resilient operations supporting stable core earnings

## Funds from Operations

(\$ mn)

- German Solar Portfolio
- Wind Farms Portfolio
- Transition Assets (KMC and AGPC)
- City Energy

- The FFO for **City Energy** was slightly lower y-o-y at approx. S\$12 mn for 1Q 2026, mainly due to higher tax paid. The core business continued to strengthen with the following:
    - ✓ 1Q 2026 recorded 3,772 residential gas water heater sales, a 49% y-o-y increase to reach approx. 27.3% market share for new HDB households.
    - ✓ Net new commercial and industrial customers leading to gas volume growth of 1.9% y-o-y.
    - ✓ Limited impact from the Middle East conflict in 1Q 2026; however, a larger under-recovery is expected in 2Q 2026 due to higher gas costs as tariff adjustments will only take effect in the subsequent quarters.
  - The FFO for the **Transition Assets** was approx. S\$25 mn for 1Q 2026. This included a residual S\$5.8 mn cash surplus from AGPC representing the final receipt from the 4Q 2025 capital management exercise. Excluding this, FFO was slightly lower y-o-y.
    - ✓ KMC: Contractual availability of 100% achieved in 1Q 2026 with FFO of S\$10.7 mn vs S\$10.5 mn in the prior year.
    - ✓ AGPC: There are no supply and pipeline disruptions.
  - The FFO for the **Wind Farms Portfolio** was approx. S\$22 mn for 1Q 2026, 16% higher y-o-y.
    - ✓ FFO for the European Onshore Wind Platform was stable y-o-y.
    - ✓ Stronger wind conditions at BKR2 for Jan and Feb 2026 drove a 47% year-on-year increase in production volume.
  - The FFO for the **German Solar Portfolio** was approx. S\$13 mn for 1Q 2026, up 30% y-o-y supported by stable performance and lower customer rebates.

# Environmental Services

Lower FFO for Singapore assets post-SingSpring extension; recovery actions underway in EMK

### Funds from Operations

(\$ mn)

- The FFO for the **Singapore Waste and Water Assets** was approx. S\$10 mn for 1Q 2026, following the extension of the Water Purchase Agreement for SingSpring Desalination Plant in December 2025.
  - ✓ Met all contractual obligations with the regulators (NEA and PUB) in 1Q 2026.
  - ✓ Continue pursuing opportunities for concession extensions.
- The negative FFO for **EMK** in 1Q 2026 was mainly attributable to continued pricing constraints in the landfill business.

#### Landfill business

- ✓ Landfill average selling prices (ASPs) remained weak during the quarter, therefore EMK continues to exercise pricing discipline to preserve long-term value of the landfill business.

#### Incineration business

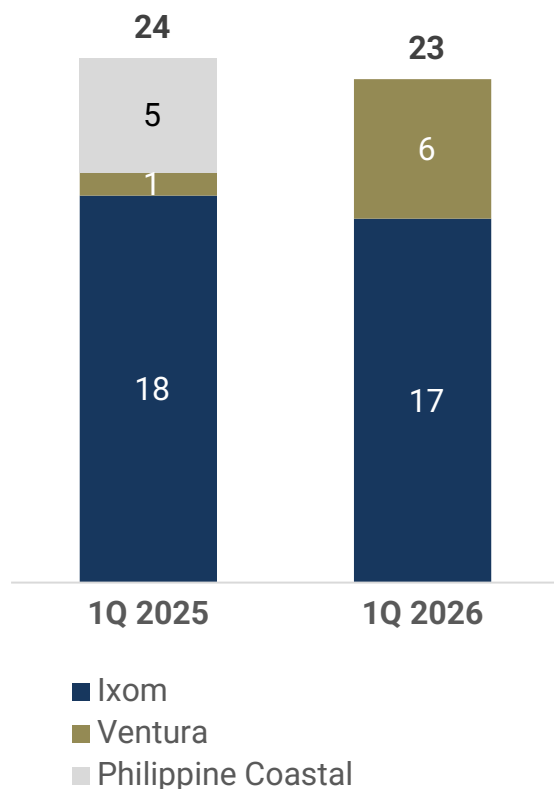

- ✓ EMK is enhancing sales efforts to prioritise capturing waste volumes with higher ASP over the year, alongside a planned capacity expansion for the KED incineration plant in 2H 2026.

# Distribution & Storage

Stable business performance for Ixom and Ventura

## Funds from Operations

(S\$ mn)

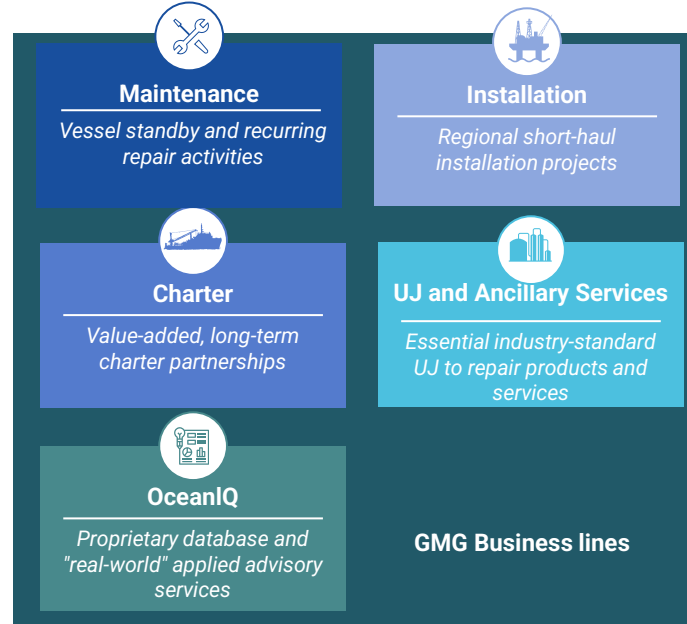

- The FFO for **Ixom** was S\$16.6 mn for 1Q 2026, a decrease of 6% from 1Q 2025 FFO of S\$17.7 mn.
  - ✓ Modest decline in FFO in 1Q 2026 was mainly attributable to higher tax paid, partially offset by lower maintenance capex.
- The FFO for **Ventura** was S\$6.4 mn for 1Q 2026, an increase of S\$5.3 mn compared to 1Q 2025.
  - ✓ FFO in 1Q 2026 increased mainly due to lower maintenance capex.
  - ✓ The proposed acquisition of Crown Coaches is expected to complete around 2Q 2026.
- The remaining 50% stake in Philippine Coastal was divested in March 2025.

FFO Contribution	1Q 2025	1Q 2026
Ventura	97.7% interest from 1 January to 31 March 2025	73.1% interest from 1 January to 31 March 2026
Philippine Coastal	Divested 50% interest on 20 March 2025	-

# Digital Infrastructure

Stable contracted base with incremental growth from fleet expansion

- FFO contribution was S\$0.6 mn for 1Q 2026.
- Solid operational performance with the entire fleet 100% utilised to date, supported by resilient maintenance and charter activity.
- Maintenance and charter activities represent the bulk of financial contributions, underpinned by long-term contracts.
  - ✓ Maintenance zone contracts secured up to 2029 / 2030 for the four maintenance vessels;
  - ✓ One charter contract secured up to end of 2028.
- A second-hand vessel was acquired in 1Q 2026 and is undergoing conversion, with deployment targeted around end 2026 (income contribution expected thereafter).

## Keppel

- DC development and solutions
- Operations and maintenance ("O&M") expertise
- Subsea cables development / investment, e.g. Bifrost Cable System<sup>1</sup>

## GLOBAL MARINE | GROUP

- Pre-installation consultancy
- Subsea cable installation
- Subsea cable maintenance
- UJ toolkit R&D, sales, training and certification
- Storage of spare cables in depot

# 1Q 2026 Distributable Income Analysis by Segment

S\$ '000	1Q 2026	1Q 2025	% Chg	Remarks
Energy Transition	46,511	38,865	19.7	Higher DI contribution from AGPC (which included the residual cash surplus of \$5.8 mn representing the final receipt from the 4Q 2025 capital management exercise), German Solar Portfolio and BKR2, partially offset by lower DI from City Energy mainly due to higher tax paid. Stable contribution from KMC.
Environmental Services	7,112	6,531	8.9	Higher contribution from Senoko WTE mainly due to absence of extension capex in 1Q 2026 compared to 1Q 2025, partially offset by the reduced DI contribution from SingSpring and EMK.
Distribution & Storage	21,346	23,643	(9.7)	Lower DI contribution from Ventura mainly due to the reduced stake held since 12 Aug 2025 as well as FFO-funded maintenance capex in 1Q 2026 compared to debt-funded in the prior year.
Digital Infrastructure	3,034	-	N/M	Full quarter DI contribution following completion of acquisition on 25 November 2025.
<b>Total Asset DI</b>	<b>78,003</b>	<b>69,039</b>	<b>13.0</b>	
Trust and Corporate Entities				
- Corporate <sup>1</sup>	(24,265)	(25,726)	5.7	Lower corporate expenses mainly due to lower financing costs which arose from debt repayments at Trust.
- Divestment Gain	-	21,678	N/M	Divestment gain from sale of 50% stake in Philippine Coastal <sup>2</sup> .
<b>Distributable Income</b>	<b>53,738</b>	<b>64,991</b>	<b>(17.3)</b>	
<b>Distributable Income excl. Divestment Gain</b>	<b>53,738</b>	<b>45,481</b>	<b>18.2</b>	<b>Excluding divestment gain net of management fee</b>

Notes:

1. Comprise Trust's expenses and distribution paid/payable to securities holders, management fees, debt repayment and financing costs.
2. Divestment of KIT's entire stake in Philippine Coastal was completed on 20 March 2025.

# Group Balance Sheet

S\$ mn	31 Mar 2026	31 Dec 2025
Cash	568	719
Borrowings	3,205	3,194
Net Debt	2,637	2,475
Total Assets	6,299	6,402
Total Liabilities	4,514	4,503
<b>Net Gearing<sup>2</sup></b>	<b>41.9%</b>	<b>38.7%</b>
<b>Interest Coverage Ratio (ICR)<sup>3</sup></b>	<b>8.6x</b>	<b>7.6x</b>
<b>Wtd. Ave Cost of Debt (WACD)</b>	<b>4.4%</b>	<b>4.4%</b>
<b>- Trust level WACD</b>	<b>3.3%</b>	<b>3.4%</b>

## Debt Profile by Currency and Type

- Weighted Average Debt Maturity as at end 1Q 2026 increased to 3.5 years compared to end FY 2025 post refinancing.
- The increase in Net Gearing was mainly attributable to the reduced cash balance as at 31 March 2026.

Notes:

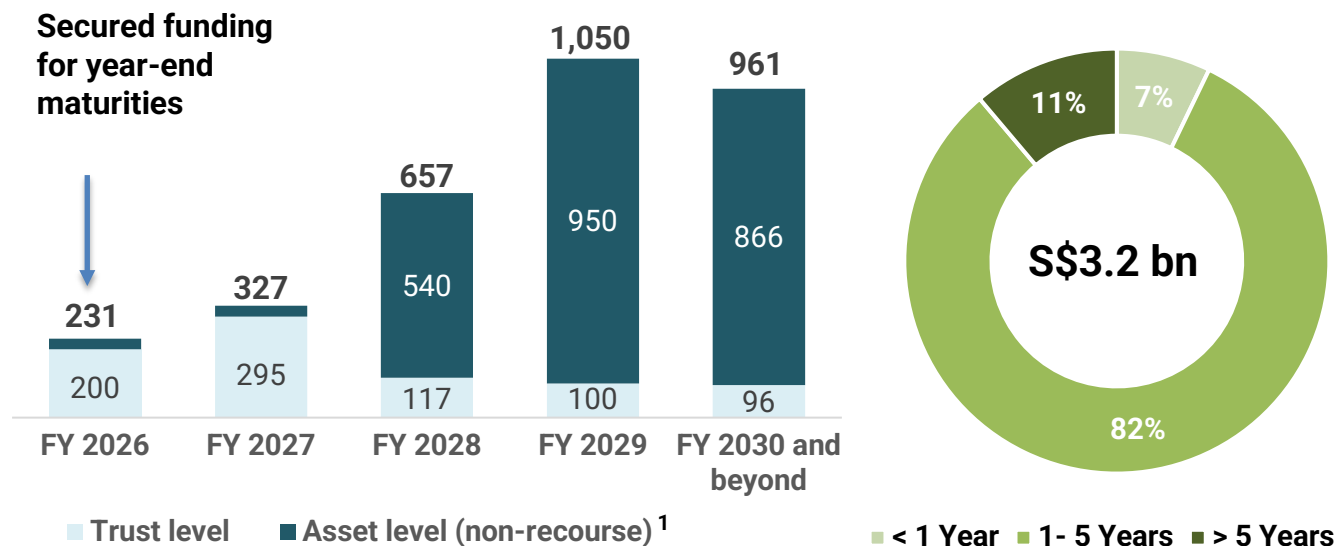

- A 25bps change in interest rate would have a c.1% impact on 1Q 2026 Distributable Income.
- Calculated based on book value of assets. There are no gearing restrictions on business trusts. KIT has S\$800 mn of perpetual securities in issue as at 31 March 2026.
- Computed at the Trust level. The ratio excluded the cash surplus from AGPC and divestment proceeds.

# FY 2026 Refinancing Secured

## Capital Management Priorities

- 1 Cash Flow Growth**  
 Drive revenue growth and operational cost savings, thereby increasing cash flow
- 2 Liquidity**  
 Ensure liquidity through capital recycling to unlock capital; complete refinancing ahead of debt maturity
- 3 Financing Cost & Optimal Risk-Adjusted Returns**  
 Manage average portfolio financing cost; maintain optimal levels in financial hedges to reduce volatility to portfolio
- 4 Capital Recycling**  
 Realise mature assets and redeploy capital to DPU accretive acquisitions or to reduce debt
- 5 Financial Flexibility; Balanced Capital Structure**  
 Pursue accretive acquisitions through mixture of internal cash, debt and capital for redeployment

## Debt Maturity Profile as at 31 March 2026 (S\$ mn)

- Successfully completed the early refinance of the S\$663 mn asset level loan for Ixom.
- Successfully launched and priced a S\$200 mn 7-year medium-term note on 21 April 2026, fully addressing the remaining December 2026 maturities.
- Undrawn committed revolving credit facilities (Trust level) of approximately S\$193 mn as at end March 2026.

Note:

1. Non-recourse loans to KIT comprise approximately S\$2.4 bn, attributable to City Energy, IXOM, Ventura, EMK and KMC.

# Outlook

---

# Portfolio Cash Flow Resilience Amid Ongoing Middle East Conflict

Closely monitoring developments for potential second-order effects

## Cash Flow Defensiveness

Most assets located  
outside Middle East

Direct exposure to the Middle East is **limited**

- › Most assets are located outside of the region and there is **no disruption** to gas pipelines for AGPC.

Operate under long term  
contracts

&

Cost pass-through  
mechanism

Increased costs largely recovered through built-in **cost pass-through mechanism**, with a time lag

- › For City Energy, higher global gas prices coupled with timing differences in tariff adjustments, are expected to lead to a larger under-recovery in 2Q 2026. Implementing cost deferral measures to partially mitigate the impact.
- › For Ixom, general ability to pass-through costs to end customers, through negotiations, with potential time lag in recovery. Some potential impact from higher diesel costs and for some chemical products. Focus on maintaining supply and distribution.
- › For Ventura, fuel price increases largely recoverable through contract indexation mechanism, though with a timing lag. Private charter fuel costs being managed through contract pricing.

Management **continues to monitor the situation closely for second order effects** in terms of the impact on gas supply, energy prices and macroeconomic activity
