

# Proposed Investment in German Offshore Wind Farm

12 August 2022

# Important Notice

The information contained in this presentation is for information purposes only and does not constitute or form part of, and should not be construed as, any offer or invitation to sell or issue or any solicitation of any offer or invitation to purchase or subscribe for any units ("Units") in Keppel Infrastructure Trust ("KIT") or rights to purchase Units in Singapore, the United States or any other jurisdiction. This presentation is strictly confidential to the recipient, may not be reproduced, retransmitted or further distributed to the press or any other person, may not be reproduced in any form and may not be published, in whole or in part, for any purpose to any other person with the prior written consent of the Trustee-Manager (as defined hereinafter). This presentation should not, nor should anything contained in it, form the basis of, or be relied upon in any connection with any offer, contract, commitment or investment decision whatsoever and it does not constitute a recommendation regarding the Units.

The past performance of KIT is not necessarily indicative of its future performance. Certain statements made in this presentation may not be based on historical information or facts and may be "forward-looking" statements due to a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, competition from similar businesses and governmental and public policy changes, and the continued availability of financing in the amounts and terms necessary to support future business. Such forward-looking statements speak only as of the date on which they are made and KIT does not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. Accordingly, you should not place undue reliance on any forward-looking statements.

Prospective investors and unitholders of KIT ("Unitholders") are cautioned not to place undue reliance on these forward-looking statements, which are based on the current view of Keppel Infrastructure Fund Management Pte. Ltd. (as trustee-manager of KIT) ("Trustee-Manager") on future events. No representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information, or opinions contained in this presentation. The information is subject to change without notice, its accuracy is not guaranteed, has not been independently verified and may not contain all material information concerning KIT. The information set out herein may be subject to updating, completion, revision, verification and amendment and such information may change materially. The value of Units and the income derived from them may fall as well as rise. Units are not obligations of, deposits in, or guaranteed by, KIT, the Trustee-Manager or any of its affiliates and/or subsidiaries. An investment in Units is subject to investment risks, including the possible loss of the principal amount invested.

Investors have no right to request the Trustee-Manager to redeem their Units while the Units are listed. It is intended that Unitholders may only deal in their Units through trading on Singapore Exchange Securities Trading Limited ("SGX-ST"). Listing of the Units on SGX-ST does not guarantee a liquid market for the Units.

The information contained in this presentation is not for release, publication or distribution outside of Singapore (including to persons in the United States) and should not be distributed, forwarded to or transmitted in or into any jurisdiction where to do so might constitute a violation of applicable securities laws or regulations.

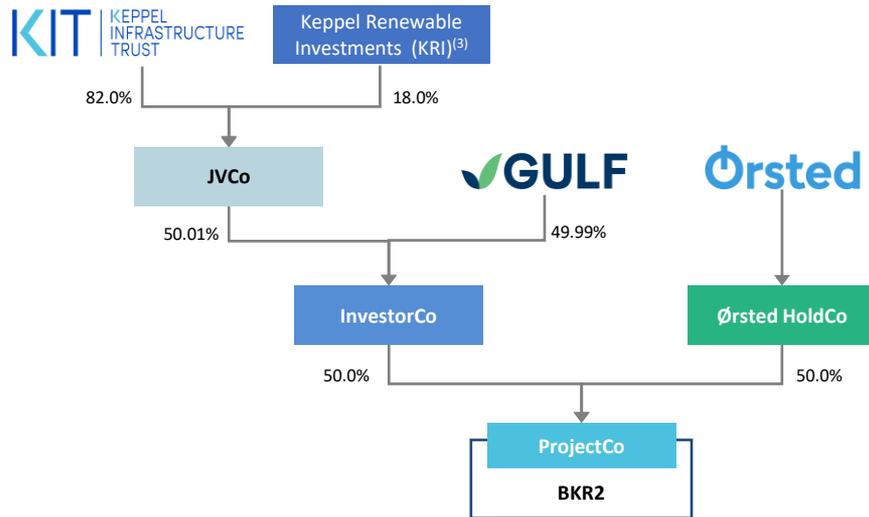

This presentation is not for distribution, directly or indirectly, in or into the United States. No Units are being, or will be, registered under the U.S. Securities Act of 1933, as amended ("Securities Act"), or the securities laws of any state of the U.S. or other jurisdiction and no such securities may be offered or sold in the U.S. except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and any applicable state or local securities laws. No public offering of securities is being or will be made in the U.S. or any other jurisdiction.

None of Gulf Energy Development Public Company ("Gulf") or any of their respective employees, agents or representatives shall have any liability whatsoever (in negligence or otherwise) for this presentation, statements made in the related oral presentation of these materials or any loss howsoever arising from any use of these materials or its contents, any related oral presentation or otherwise arising in connection with this presentation. This presentation has not been prepared by Gulf or any member of the Gulf group and none of such entities have verified any information contained herein. Investors may not rely on Gulf or any member of the Gulf group or any of their respective employees, agents or representatives in connection with this presentation or statements made in the related oral presentation. Investors will have no recourse to Gulf or any of their respective in respect of the investment.

# Deepen exposure in renewables with first offshore wind investment

KIT's second investment in renewables, reinforcing strategy to grow the Energy Transition segment

- Jointly investing with Keppel Corporation to acquire a 25%<sup>(1)</sup> stake in Borkum Riffgrund 2 (BKR2), a 465MW operating German offshore wind farm with a remaining useful life of 31 years<sup>(2)</sup> until 2053
- BKR2 is operated by Ørsted through a 20-year operation and maintenance (O&M) agreement until 2038: operational costs largely fixed, covering scheduled maintenance

**Partners**

*Thailand's largest private power producer by market value*

*A global leader in offshore wind power*

## Key Terms of Proposed Investment

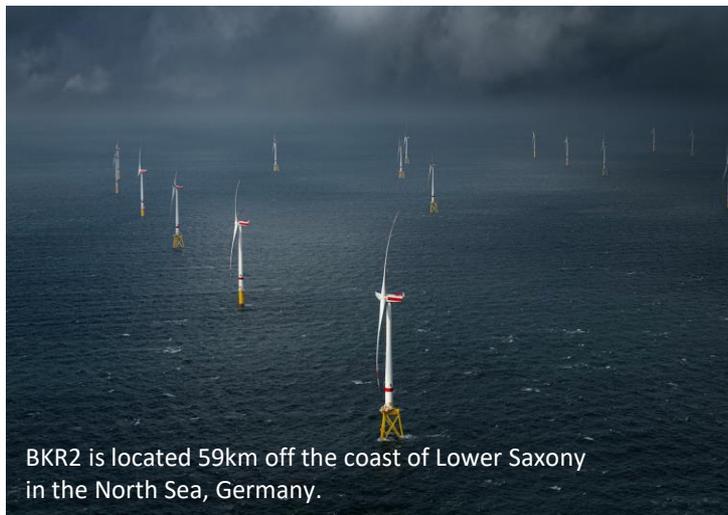

<b>Seller</b>	Gulf Energy Development
<b>Purchase Consideration</b>	Total: €305.0m (\$\$445.3m) <sup>(4)</sup> (KIT: €250.1m (\$\$365.1m))
<b>Proposed Funding</b>	Combination of internal sources of funds, equity and/or debt capital market issuances and/or external borrowings
<b>Expected Completion</b>	4Q 2022, subject to customary closing conditions precedents, including merger clearance and foreign direct investment clearance approvals from Germany

- KIT will hold an effective stake of approx. 20.5% and Keppel Corporation will hold an effective stake of approximately 4.5% in the BKR2 wind farm through KRI.
- Assuming successful extension of the initial 25-year offshore permit.
- KRI is a wholly owned subsidiary of Keppel Corporation.
- Excluding acquisition and transaction costs. Based on EUR/SGD of 1.46.

# Well-located windfarm backed by an attractive FiT<sup>(1)</sup> regime

Strong and consistent wind strength and resource availability in the North Sea

- High wind resource availability in the North Sea: high capacity<sup>(2)</sup> factor of >40% with low variability of <10% between P90 and P50<sup>(3)</sup>
- Located next to Wadden Sea where new wind farms are unlikely to be built given it is an UNESCO World Heritage site, mitigating potential reduction in wind availability to BKR2

## Capacity:

465MW (from 56 MHI Vestas V164-8.3MW wind turbine generators); export capacity of 450MW

## Grid Connection:

TenneT, the largest of 4 transmission system operators in Germany (TenneT rated A- by S&P and A3 by Moody's)

## Offshore permit:

Until 2043

## Commercial Operations

Date: April 2019

## Asset Technical Life:

35 years

1. Feed-In Tariff.
2. Capacity factor refers to the average output or throughput over a period of time divided by its output or throughput if it had operated at full capacity over that time period.
3. P90 and P50 are probability figures of the annual average level of wind generation, e.g. P90 denotes that annual generation is predicted to be exceeded 90% over a year.

# Key investment highlights

1 Favourable tailwinds supporting positive renewable energy outlook

2 FiT regime and guaranteed price floor provide cash flow visibility

3 Ørsted a strong operating partner with a proven track record

4 Accretive investment with attractive returns

5 Contribute to an enlarged and diversified portfolio

6 Further KIT's environmental targets with increased renewables exposure

# Favourable tailwinds supporting positive renewable energy outlook

Driven by decarbonisation and the German government's push to increase offshore wind capacity

## Demand drivers

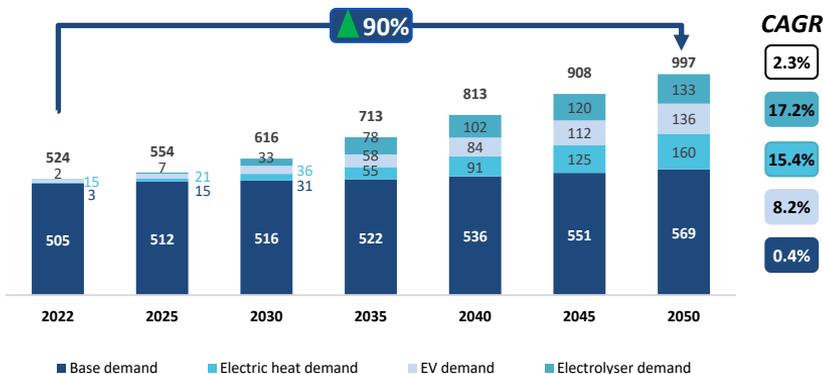

- Electricity demand to grow by 2.3% CAGR from 2022 to 2050, supported by decarbonisation and electrification of key sectors
- Germany brought forward 100% renewables target by 15 years to 2035; plans to triple the pace of capacity expansion for wind and solar

## Key Drivers in Germany

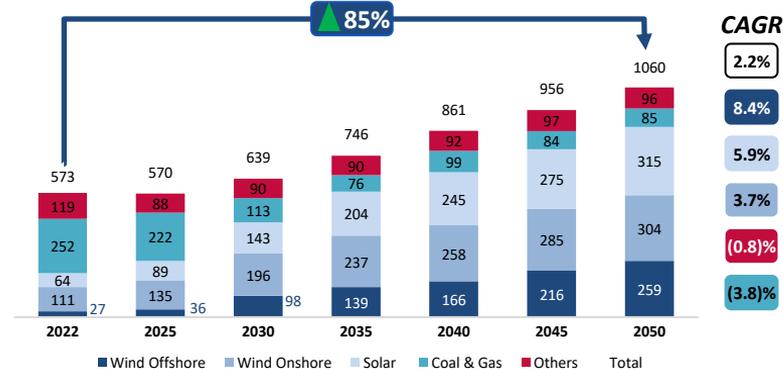

## Supply drivers

- Strong regulatory support to increase offshore wind capacity by 3.3x, from current 8.3GW to 27.1GW in 2030
- Closure of 31.3GW of coal and 4.3GW of nuclear plants (totaling 16% of FY2022 German capacity) due to government policy

Net Annual German Power Demand – By Type (TWh)

Net Annual German Power Generation – By Type (TWh)

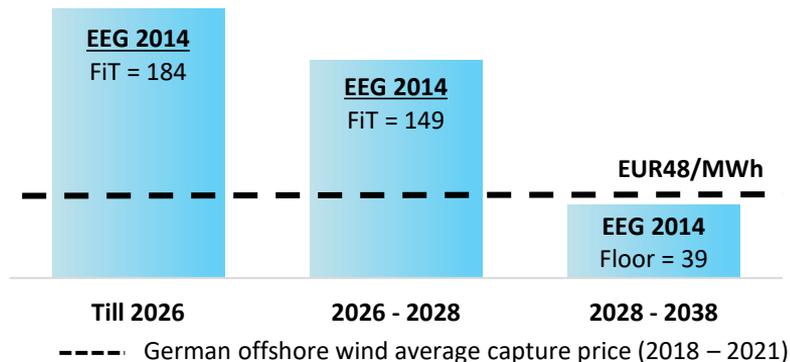

# FiT regime and guaranteed price floor provide cash flow visibility

Stable power price outlook in the long term with projected capture price above price floor

- BKR2 operates under the German EEG 2014 market premium mechanism with attractive FiT and guaranteed floor price till 2038
- Legislation prohibits the German government from retrospectively amending the awarded FiT and floor price to the detriment of beneficiaries
- Fixed FiT underpinned by the German renewable energy law is significantly above the average wind capture price
- Stable long-term outlook: projected capture price above floor
- Short term spike in capture price due to the Russia-Ukraine war

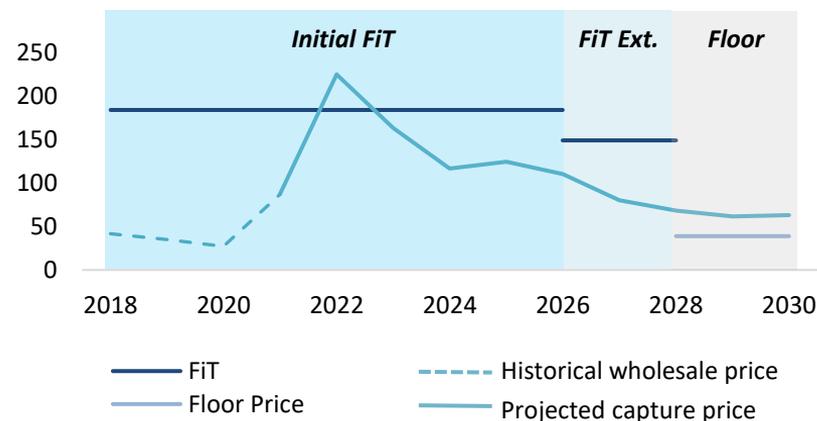

## BKR2 EEG 2014 FiT regime

(Nominal, EUR/MWh)

## Power Price Outlook and FiT Scheme

(Nominal, EUR/MWh)

Sources: Wood Mackenzie, Erneuerbare-Energien- Gesetz – German Renewable Energy Sources Act (EEG 2014)

# Ørsted a strong operating partner with a proven track record

Partnering with a highly regarded developer and operator in the offshore wind sector

- Ørsted is a leading player in offshore wind power industry globally with over 30 years of experience
- BKR2 to benefit from operational efficiencies, given proximity within Ørsted's offshore wind farm cluster in the North Sea off the coast of Germany

## 28

Offshore wind farms in operation<sup>(1)</sup>

## 7.5GW

Installed operational capacity with ~3.5GW under construction<sup>(2)</sup>

Track Record

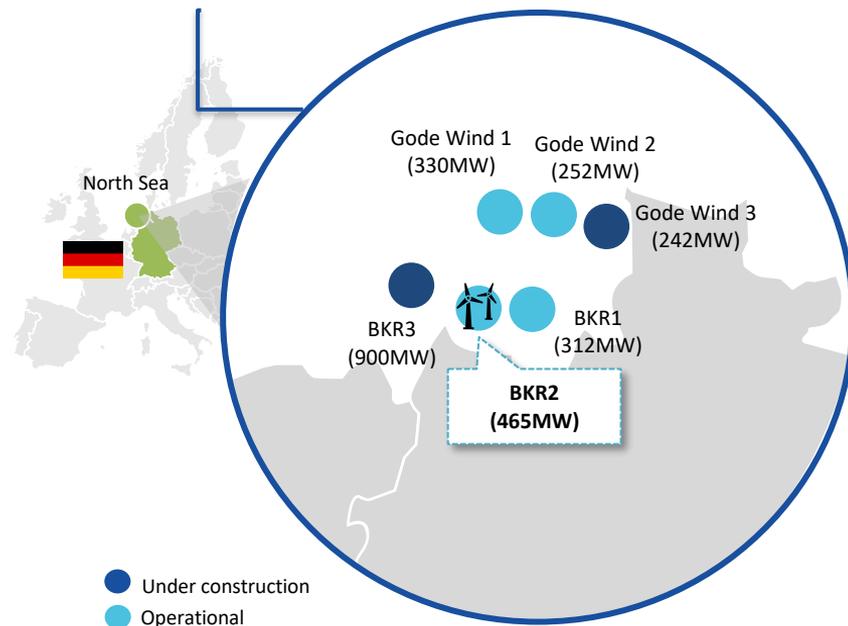

World's first large-scale offshore wind farm (Denmark, 160MW operational capacity)

World's largest operational offshore wind farm (UK, 1.2GW operational capacity)

Ørsted's offshore wind farm cluster in the North Sea off the coast of Germany

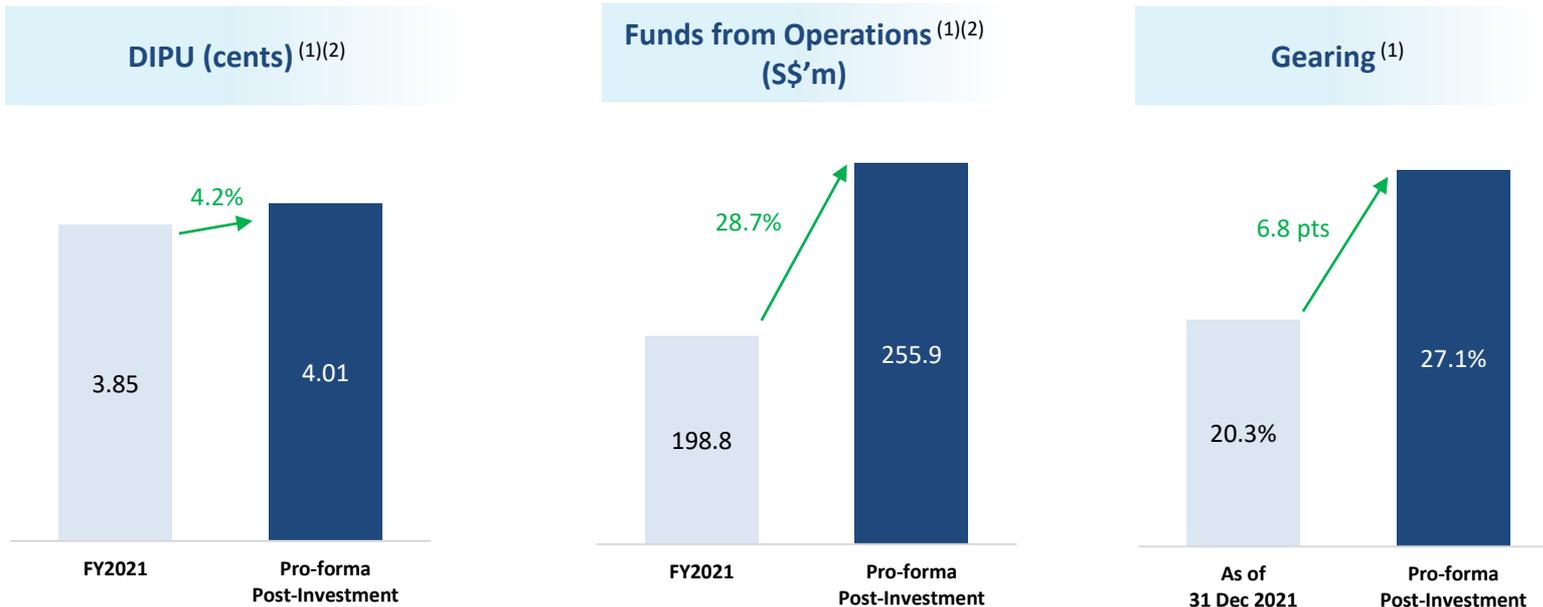

Sources: Ørsted

1. As of 31 Dec 2021

2. As of 7 Jul 2022

# Accretive investment with attractive returns

Deliver DIPU-accretion to Unitholders

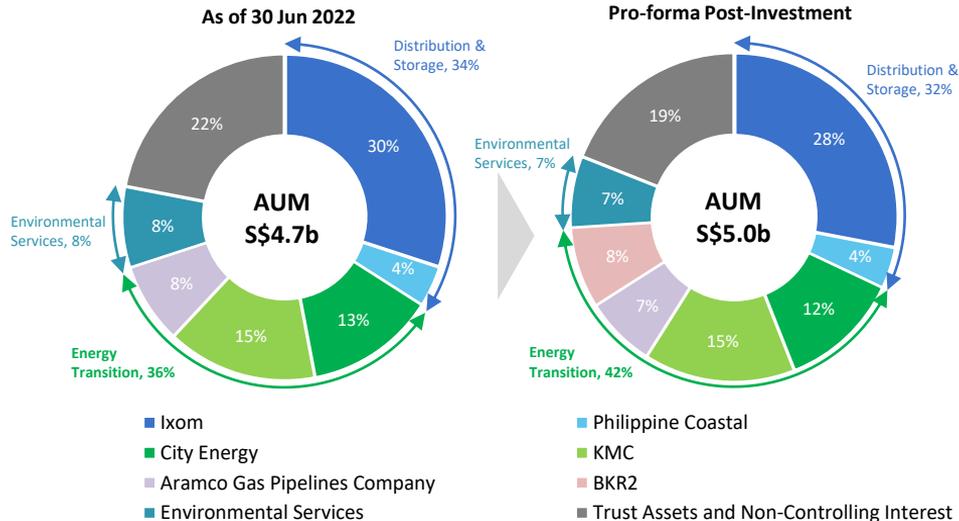

1. Pro-forma figures assume the estimated transaction expenses and KIT's share of equity commitment is fully funded by existing free cash and debt facilities.
2. Includes adjustments to the FY2021 revenue of BKR2 based on historical gross production for the financial year ended 31 Dec 2020 and the 6-month period ending Jun 2022 with the implied average sale price in the financial year ended 31 Dec 2021. The adjustments have been made to reflect a normalised production basis for FY2021 because in FY2021, all wind farms in Europe were affected by a wind drought that occurred in the summer and early autumn. The wind drought resulted in Europe experiencing the lowest wind speed in 60 years and consequently, lower gross production by all wind farms in Europe.

# Contribute to an enlarged and diversified portfolio

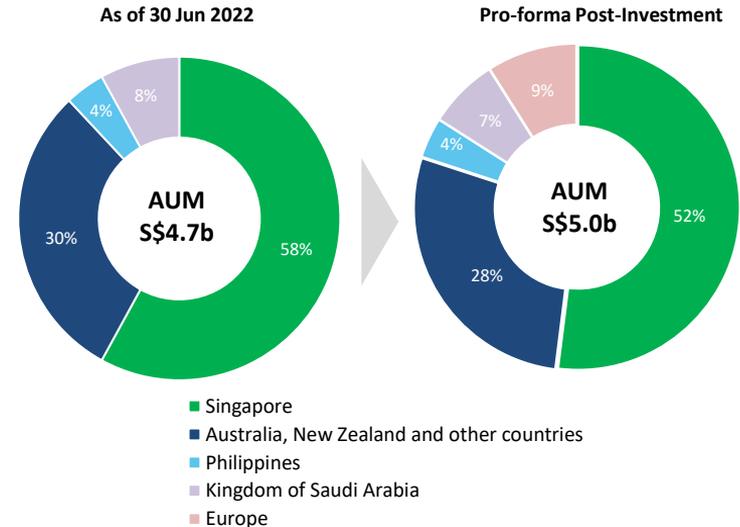

KIT's AUM to grow from S\$4.7b as at 30 Jun 2022 to approx. S\$5.0b post-investment<sup>(1)</sup>

- Diversify KIT's portfolio into Germany (highest credit rating of AAA/Aaa/AAA<sup>(2)</sup>), and expanding presence in Europe
- Energy Transition segment to increase to 42% of AUM, in line with strategy to capitalise on secular growth trends and thrive in a low carbon economy
- Upon completion of this investment, and including the proposed investment in the European onshore wind platform and the proposed acquisition in Eco Management Korea, AUM will grow from S\$4.7b as at 30 June 2022 to approx. S\$6.1b

## Diversification by Asset (%)

## Diversification by Geography (%)

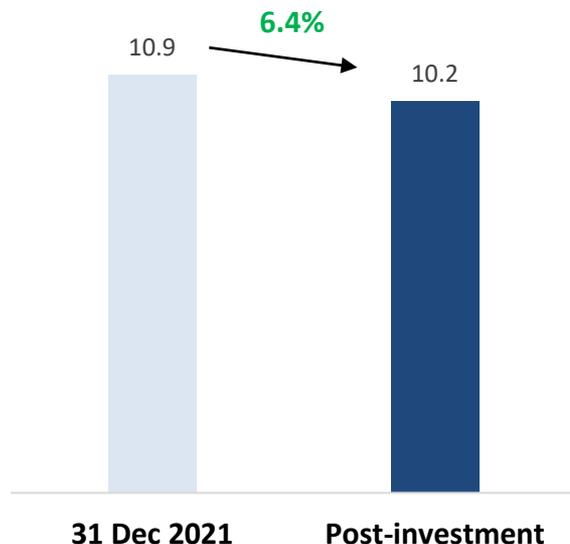

1. Post-investment figures assume KIT's share of equity commitment is fully funded by existing free cash and debt facilities.
2. Credit ratings from S&P, Moody's, Fitch respectively.

# Further environmental targets with increased renewables exposure

Proposed investment to reduce KIT's emission intensity and contribute to renewables target

## Post-investment Effects

Carbon emissions ('000t CO<sub>2</sub>) /  
Distributable Income<sup>(1)</sup> (\$m)

- Support climate agenda: Germany brought forward its 100% renewables target by 15 years to 2035
- Contribute to KIT's environmental targets
  - Increase KIT's renewable energy portfolio to over 700 MW<sup>(2)</sup>
  - Increase exposure to renewable energy to 11% of AUM post-investment<sup>(3)</sup>
  - Progressing KIT's decarbonisation roadmap, reducing carbon emission intensity by 6.4% from 2021 level<sup>(2)</sup>

1. Calculated based on KIT's proforma FY2021 Distributable Income (DI), KIT's FY2021 carbon emissions, BKR2 normalised proforma FY2021 DI, BKR2 actual FY2021 carbon emissions, actual FY2021 carbon emissions and FY2021 DI from the existing assets in the portfolio from the recent proposed investment in the European onshore wind platform announced on 13 Jul 2022.
2. Including the existing assets in the portfolio from the recent proposed investment in the European onshore wind platform announced on 13 Jul 2022.
3. Including the recent proposed investment in the European onshore wind platform announced on 13 Jul 2022, assuming total commitment is deployed.
